STATE OF ARIZONA  
STATE LAND DEPT  
1616 W ADAMS  
PHOENIX, AZ 85007

Dear Irrigation Grandfathered Right Holder:

Enclosed is an OFFICIAL NOTICE of your agricultural conservation requirements for the third management period. These conservation requirements are effective beginning in calendar year 2003 and shall remain in effect until the first compliance date of the conservation requirements established for your Irrigation Grandfathered Right in the Fourth Management Plan. **PLEASE CAREFULLY REVIEW THIS LETTER AND THE ENCLOSED NOTICE.**

The Director of the Arizona Department of Water Resources ("Director") adopted the Third Management Plan ("TMP") for the Prescott Active Management Area ("AMA") in December of 1999. As originally adopted, the TMP did not contain a Base Agricultural Conservation Program with new irrigation water duties and maximum annual groundwater allotments for farms in the AMA because of questions regarding the appropriate irrigation efficiency to use when calculating the water duties. This issue was resolved in 2002 when the Legislature enacted legislation requiring the Director to calculate the irrigation water duties for most farms in the AMA using an assigned irrigation efficiency of 80 percent. A lower assigned irrigation efficiency may be used for farms determined by the Director to have limiting soils or excessive slopes and for farms where orchard crops were historically grown and continue to be grown. The legislation also requires the Director to modify the TMP to include a Best Management Practices ("BMP") Program as an alternative to the Base Program.

In April of 2003, the Director adopted modifications to Chapter 4 of the TMP to comply with the legislation enacted in 2002. The modifications include the addition of a Base Program with irrigation water duties calculated in the manner required by the legislation and the addition of a BMP Program. The Historic Cropping Program, an alternative program that was included in the TMP as adopted in 1999, was retained in the modifications. The purpose of this notice is to inform you of the water duties and allotments established for your farm and of the availability of the alternative programs. The official language of the modification to Chapter 4 may be reviewed at the Department's website, [www.water.az.gov](http://www.water.az.gov).

#### I. Base Agricultural Conservation Program Water Duties and Allotments

The irrigation water duty and maximum annual groundwater allotment adopted for your farm for the Base Program are set forth in the enclosed "Notice of Irrigation Water Duty and Maximum Annual Groundwater Allotment." You must comply with the water duty and annual allotment unless you apply for and are accepted for regulation under one of the alternative agricultural conservation programs described below.

FCTL003074

## II. Alternative Agricultural Conservation Programs

There are two conservation programs available to you as alternatives to the Base Program: the BMP Program and the Historic Cropping Program. The BMP Program requires the implementation of specific agricultural conservation practices on the farm in lieu of complying with a water duty and annual allotment. Under the Historic Cropping program, the Director will calculate the water duty and annual allotment using an assigned irrigation efficiency of 75 percent. If a farm has limiting soils, the Director may use an assigned irrigation efficiency of 70 percent. Use of flex account provisions is limited under the Historic Cropping Program. An individual who wishes to be regulated under one of these alternative programs must apply on a form prescribed and furnished by the Director. The Director must approve the application before the individual can be regulated under the program.

The Director has found the Base Program irrigation water duties and maximum annual groundwater allotments established in the modifications to Chapter 4 of the TMP to be achievable for most Irrigation Grandfathered Right holders. However, there are two separate methods for seeking administrative relief from the water duty and annual allotment established for your farm if you believe you will be unable to comply with them. You may request a VARIANCE or an ADMINISTRATIVE REVIEW.

### 1. VARIANCE

A person who requires additional time to comply with a new conservation requirement may apply to the Director for a VARIANCE from the requirement pursuant to A.R.S. § 45-574. The Director may grant a variance for up to five years upon a showing of "compelling economic circumstances." **AN APPLICATION FOR A VARIANCE MUST BE FILED WITHIN 95 DAYS AFTER THE DATE OF THIS NOTICE.**

### 2. ADMINISTRATIVE REVIEW

If you feel that a conservation requirement is unreasonable as applied to you, you may apply for an ADMINISTRATIVE REVIEW of the requirement pursuant to A.R.S. § 45-575(A). **AN APPLICATION FOR AN ADMINISTRATIVE REVIEW UNDER A.R.S. § 45-575(A) MUST BE FILED WITHIN 95 DAYS AFTER THE DATE OF THIS NOTICE.** An administrative review may also be applied for at any time during the third management period if extraordinary circumstances not in existence as of the date of this notice make it unreasonable to require your compliance with a conservation requirement.

If you have any questions regarding your conservation requirements, or if you need an application form and information on one of the alternative conservation programs or on the variance and administrative review procedure, please contact the Prescott AMA office at (928) 778-7202

Sincerely,

*s/Herbert R. Guenther*

Herbert R. Guenther  
Director

**FCTL003075**

**ARIZONA DEPARTMENT OF WATER RESOURCES  
PRESCOTT ACTIVE MANAGEMENT AREA  
NOTICE OF IRRIGATION WATER DUTY  
AND MAXIMUM ANNUAL GROUNDWATER ALLOTMENT**

Pursuant to A.R.S. § 45-572(B), the Director of the Arizona Department of Water Resources hereby gives notice of the irrigation water duty and maximum annual groundwater allotment established for the Irrigation Grandfathered Right listed below in the Third Management Plan for the Prescott Active Management Area.

**The water duty and annual allotment shall become effective beginning in calendar year 2003 and shall remain in effect until the first compliance date of the water duty and annual allotment established for the Irrigation Grandfathered Right in the Fourth Management Plan. The owner of the Irrigation Grandfathered Right and any person using groundwater pursuant to the right must comply with the water duty and annual allotment while regulated under the Base Agricultural Conservation Program in the Third Management Plan.**

**IRRIGATION GRANDFATHERED RIGHT NO. 58-107206.0000**

**ASSIGNED IRRIGATION EFFICIENCY: 75 PERCENT**

**IRRIGATION WATER DUTY: 4.87 ACRE-FEET PER ACRE**

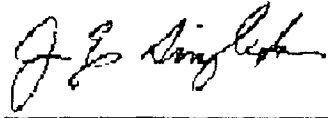

**MAXIMUM ANNUAL  
GROUNDWATER ALLOTMENT: 13.15 ACRE-FEET PER YEAR**

The **irrigation water duty** is the amount of water in acre-feet per acre that is reasonably required to irrigate the crops historically grown in the farm unit to which the above-referenced Irrigation Grandfathered Right is appurtenant. The **maximum annual groundwater allotment** is the maximum amount of water that may be used in any year to irrigate the irrigation acres associated with the Irrigation Grandfathered Right, except as provided by A.R.S. 45-467, the flexibility account provision. The annual allotment is calculated by multiplying the water duty for the Irrigation Grandfathered Right by the number of water duty acres associated with the right.

**FCTL003076**

**CERTIFICATE OF MAILING**

I certify that on this 9th day of June, 2003, a copy of the attached letter and notice were sent by first-class mail to the addressee shown on the letter at the address shown on the letter.

**2001**  
**FIRST NOTICE OF VIOLATION**  
**OF A.R.S. §45-632**  
**FAILURE TO FILE AN ANNUAL REPORT**

Records of the Department of Water Resources ("Department") indicate that you are responsible for filing an **Annual Water Withdrawal and Use Report** ("Annual Report") with this Department for the right or permit number listed above. Pursuant to Arizona Revised Statute ("A.R.S.") §45-632(O), the Annual Report must be filed no later than March 31 of each year for the preceding calendar year. According to our records, the Department has not received an Annual Report for calendar year 2001.

The penalty for failure to file the report is \$25.00 for each month or portion of a month that the report is delinquent. A.R.S. §45-632(O). After six months, failure to file an Annual Report may also subject you to enforcement action involving civil penalties.

If you did not withdraw any groundwater in 2001, you may avoid further accrual of late filing fees by filing your report by April 30, 2002, along with a late payment fee of \$25.00.

If you withdrew groundwater in 2001, you also are subject to statutory late payment fees of ten percent of the unpaid withdrawal fee for each month or a portion of a month that the fee is delinquent. A.R.S. §45-614(E). You may avoid further accrual of both late filing and late payment fees by filing your report by April 30, 2002, along with payment of the standard groundwater withdrawal fee of \$2.00 per acre foot, a late filing fee of \$25.00, a late payment fee of ten percent (10%) of the withdrawal fee, and the WQARF fees (if applicable).

If the water right has been sold, you must notify the Department. Please call the Prescott Active Management Area at (928) 778-7202 if you have questions or believe an error has been made.

Please send report to: Arizona Department of Water Resources - Groundwater Management Support Section -

## WATER RECEIVED FROM OTHER SOURCES AMA - PRESCOTT

ARIZONA DEPT. OF  
WATER RESOURCES  
DWR-AR-6-92

### INSTRUCTIONS

**Irrigation Grandfathered Right Holders** - Use Part 1 for all water received from an irrigation district. Spill water will not be charged to your flexibility account. The amount of effluent and surface water charged to your flexibility account may differ from the amounts actually received. Contact DWR for more information.

**Municipal Providers** - Use Part 1 for the water received from an irrigation district, including CAP water from an irrigation district. Use Part 3 for CAP water received from CAWCD or from another municipal provider. Spill water and effluent will not be used to determine compliance with your GPCD target.

**Type 1 Rights** - Do not report sources other than groundwater. If you receive groundwater from a source other than an irrigation district, the amount of water received from each well must be reported.

**Type 2 Rights and Groundwater Withdrawal Permits** - Do not report sources other than groundwater. The amount of groundwater received from each well must be reported. Any well used must be reported. Any well used must be listed on your Type 2 certificate or groundwater withdrawal permit.

## 1. STATE OF ARIZONA - STATE LAND DEPARTMENT

Last Name First Middle or Initial

Last Name First Middle or Initial

1624 WEST ADAMS PHOENIX ARIZONA 85007  
Mailing Address City State Zip

NOTE: This form is to be filled out only for acres which you own. If you lease farm land, make sure that the owner of the leased land or his authorized agent is aware of the requirement to file for that land.

2. Legal description of all land presently owned by applicant in the Active Management Area which was legally irrigated at any time between January 1, 1975 and January 1, 1980.

S2/3S1/2SE1/4SE1/4SW1/4 T13N R1E Section 2

3. Total number of acres in Item 2: 3.30

4. Describe the location of each well used to irrigate the land. Indicate as accurately as possible the year the well was drilled.

NW  $\frac{1}{4}$ , SW  $\frac{1}{4}$ , SE  $\frac{1}{4}$ , Section 2 Township 13N Range 1E Year \_\_\_\_\_  
\_\_\_\_  $\frac{1}{4}$ , \_\_\_\_  $\frac{1}{4}$ , \_\_\_\_  $\frac{1}{4}$ , Section \_\_\_\_\_ Township \_\_\_\_\_ Range \_\_\_\_\_ Year \_\_\_\_\_  
\_\_\_\_  $\frac{1}{4}$ , \_\_\_\_  $\frac{1}{4}$ , \_\_\_\_  $\frac{1}{4}$ , Section \_\_\_\_\_ Township \_\_\_\_\_ Range \_\_\_\_\_ Year \_\_\_\_\_  
\_\_\_\_  $\frac{1}{4}$ , \_\_\_\_  $\frac{1}{4}$ , \_\_\_\_  $\frac{1}{4}$ , Section \_\_\_\_\_ Township \_\_\_\_\_ Range \_\_\_\_\_ Year \_\_\_\_\_

5. Is the land served by an irrigation district, agricultural improvement district or irrigation water delivery district? \_\_\_\_\_ Yes ☒ No

If so, give name of district and point of diversion:

6. Is groundwater the sole source of water? \_\_\_\_\_ Yes ☒ No

7. If water sources other than groundwater are used, indicate the basis on which those supplies are available to you; for example: court decree, delivery contract, surface water appropriation, contract for sewage effluent, etc. Be as specific as possible.

Natural rainfall which periodically is spread over area by spreader dike. The total amount of surface water which is put to beneficial use is minimal because the catchment area is very small.

FCTL003097

8. Have you owned the land since January 1, 1975? X Yes \_\_\_\_\_ No. If not, list below the name and address of the previous owner of the land and the date of purchase \_\_\_\_\_

9. Indicate the crops grown, the number of acres planted in each crop and the total number of acres planted in each year. Do not count double cropped acres twice in the last column. Indicate irrigation methods used for each crop for 1979 only.

	crops grown	# acres in crop	irrigation method	total # acres planted
1979	Fescue	2.65	flood irrigation	2.65
1978	"	2.65		2.65
1977	"	2.65		2.65
1976	"	2.65		2.65
1975	"	2.65		2.65

If additional space is needed, attach additional sheet of paper

10. Indicate the amount of water used from each source in each of the five years (acre-feet).

	1975	1976	1977	1978	1979
groundwater	8.00	8.00	8.40	6.08	8.00
surface water	0.40	0.40	0.00	2.32	0.40
sewage effluent					

The above amounts are ☐ measured ☒ estimated. See instructions for documentation requirements.

COMMENTS: \_\_\_\_\_

STATE OF ARIZONA

STATE LAND DEPT

1616 W ADAMS

PHOENIX AZ 85007

Dear Irrigation Grandfathered Rightholder:

This is an OFFICIAL NOTICE that the director of the Arizona Department of Water Resources (director) has issued a final order adopting the management plan for the Prescott Active Management Area (AMA) for the third management period, 2000 to 2010. This is also an Official Notice of the irrigation water duty (water duty) and maximum annual groundwater allotment (annual allotment) established in the Third Management Plan (TMP) for your irrigation grandfathered right, which will become effective on January 1, 2002. **PLEASE CAREFULLY REVIEW THIS NOTICE AND THE ENCLOSED REQUIREMENTS.**

On December 13, 1999, the director issued a final order adopting the TMP. The TMP was adopted in accordance with Arizona's Groundwater Code (Code), which requires the director to establish a continuing mandatory conservation program for all persons withdrawing, distributing, or using groundwater within the AMA. The Code provides that the director shall establish a new irrigation water duty for each farm unit within the AMA, which shall be calculated as the quantity of water reasonably required to irrigate the crops historically grown in the farm unit, assuming maximum conservation consistent with prudent long-term farm management practices within areas of similar farming conditions, considering the time required to amortize conservation investments and financing costs.

The TMP includes water duties and annual allotments for Irrigation Grandfathered Rights in the AMA which must be complied with from January 1, 2002 until the effective date of any substitute water duty and annual allotment in the Fourth Management Plan. A farm's annual allotment was calculated by multiplying the farm's water duty by the number of water duty acres in the farm. The annual allotment is the maximum amount of groundwater that may be used in any year to irrigate the irrigation acres associated with the Irrigation Grandfathered Right, except as provided in A.R.S. § 45-467, the flexibility account statute.

The water duty and annual allotment established for your Irrigation Grandfathered Right in the TMP are set forth in the enclosed notice. The water duty and allotment are identical to the final water duty and annual allotment established for your Irrigation Grandfathered Right in the Second Management Plan (SMP), and include any adjustments made to the final SMP water duty and annual allotment pursuant to an administrative review application, with the exception of any poor water quality adjustments. If you require an adjustment to your TMP water duty and allotment due to poor water quality, you must apply for an administrative review within 90 days after you receive this notice.

**FCTL003115**

You have the right to seek administrative relief from the conservation requirements established in the TMP. You also have the right to seek judicial review of the director's order adopting the TMP. The following is a description of your rights.

#### Administrative Relief

The director has found the conservation requirements in the TMP to be equitable for most water users. However, there are two separate methods for seeking administrative relief from the conservation requirements if you believe you will be unable to comply with the requirements. You may request a VARIANCE or an ADMINISTRATIVE REVIEW.

1. VARIANCE

A person who requires additional time to comply with a conservation requirement or distribution system requirement may apply to the director for a VARIANCE from the requirement pursuant to A.R.S. § 45-574. The director may grant a variance for up to five years upon a showing of "compelling economic circumstances." An application for a variance must be filed within 90 days after the date you receive this notice.

2. ADMINISTRATIVE REVIEW

If you feel that a conservation requirement is unreasonable as applied to you, you may apply for an ADMINISTRATIVE REVIEW of the requirement pursuant to A.R.S. § 45-575(A). An application for administrative review under A.R.S. § 45-575(A) must be filed within 90 days after the date you receive this notice.

An administrative review may also be applied for at any time during the third management period if extraordinary circumstances not in existence as of the date of this notice make it unreasonable to require your compliance with a conservation requirement. If these circumstances should arise during the third management period, please contact the Prescott AMA for information and application procedures.

#### Judicial Review

In addition to seeking administrative relief through a request for variance or administrative review, you may seek judicial review of the director's order adopting the TMP pursuant to A.R.S. § 45-114(C). Any action for judicial review must be filed within thirty-five days after your receipt of this notice. You may review the entire TMP at the locations listed in Attachment B.

If you have any questions regarding your conservation requirements or if you need an application form and information on the Variance or Administrative Review procedures, please call the Prescott AMA at (520) 778-7202.

Sincerely,

Rita P. Pearson  
Director

CERTIFICATE NUMBER 58-107206.0000**

in the management plan for the Prescott Active Management Area for the third management period, 2000 to 2010. The irrigation water duty is the amount of water in acre-feet per acre that is reasonable to apply to irrigated land in a farm unit during a calendar year. The irrigation water duty for the above-referenced Irrigation Grandfathered Right was calculated using the assigned irrigation efficiency set forth below. The maximum annual groundwater allotment is the maximum amount of groundwater that may be used to irrigate the irrigation acres associated with the Irrigation Grandfathered Right, except as provided in A.R.S. § 45-467, the flexibility account statute.

Beginning calendar year 2002 and for each calendar year thereafter until the first compliance date for any substitute irrigation water duty and maximum annual groundwater allotment established in the Fourth Management Plan:

**IRRIGATION WATER DUTY: 4.87 ACRE-FEET PER ACRE**

**MAXIMUM ANNUAL GROUNDWATER ALLOTMENT: 13.14 ACRE-FEET PER YEAR**

**ASSIGNED IRRIGATION EFFICIENCY: 75 PERCENT**

Attachment A sets forth the conservation requirements for holders of irrigation grandfathered rights as adopted in the TMP. Attachment A is incorporated into this notice by reference.

**JANE DEE HULL**  
**Governor**

**RITA P. PEARSON**  
**Director**

Dear Irrigation Grandfathered Rightholder:

Enclosed is an OFFICAL NOTICE of your final agricultural conservation requirements for the second management period. These requirements will become effective on January 1, 2000.

**PLEASE CAREFULLY REVIEW THE ENCLOSED REQUIREMENTS.**

In December of 1989, the Director of the Arizona Department of Water Resources ("Director") adopted the Second Management Plan (SMP) for the Prescott Active Management Area (AMA). The SMP was adopted in accordance with Arizona's Groundwater Code, which requires the Director to establish a continuing mandatory conservation program for all persons withdrawing, distributing or using groundwater within the AMA.

For irrigation grandfathered rightholders, the Groundwater Code mandates the establishment of new irrigation water duties to be reached by the end of the second management period, and authorizes the Director to establish intermediate water duties to be reached at specified intervals during the second management period. The Groundwater Code provides that a farm's irrigation water duty must be calculated as the quantity of water reasonably required to irrigate the crops historically grown in the farm unit, and must assume maximum conservation consistent with prudent long-term farm management practices within areas of similar farming conditions, considering the time required to amortize conservation investments and financing costs. In addition, the Groundwater Code provides that the maximum annual groundwater allotment is the maximum amount of water that may be used in any year to irrigate the irrigation acres associated with the irrigation grandfathered right, except as provided in A.R.S. § 45-467, the flexibility account provision.

Irrigation grandfathered rightholders were first given written notice of their intermediate and final irrigation water duties and maximum annual groundwater allotments for the second management period within thirty days after the SMP was adopted. Additional written notice of the second intermediate irrigation water duties and maximum annual groundwater allotments was given in late 1992.

The enclosed notice is being sent to you to give you additional notice of the final irrigation water duty and maximum annual groundwater allotment for your farm, which will become effective on January 1, 2000. The final water duty and allotment set forth in this notices reflect any adjustments which may have been granted pursuant to an administrative review request filed following the original notification of the SMP conservation requirements.

**FCTL003118**

The final SMP water duty and allotment will remain in effect until the first compliance date for the irrigation water duties and maximum annual groundwater allotments established for your farm in the Third Management Plan (TMP). The Arizona Department of Water Resources ("Department") is currently in the process of developing the TMP conservation requirements. You will be notified of those requirements within thirty days after the TMP is adopted.

### **VARIANCE**

The Department considers the final irrigation water duties and maximum annual groundwater allotments established in the SMP to be achievable by most farms by the year 2000. However, if you believe you will need additional time to comply with the final water duty and allotment established for your farm, you may apply for a variance from the water duty and allotment.

A variance from a final water duty and allotment may be granted for up to five years if there are "compelling economic circumstances" preventing timely compliance with the water duty and allotment. In order to obtain a variance, an applicant must prove that the applicant's economic circumstances prevent compliance with the final water duty and allotment by the year 2000. In determining whether to grant a variance, the Department will take into consideration the applicant's flexibility account balance. Any decision made on the application will be appealable to the Office of Administrative Hearings.

**IF YOU WISH TO APPLY FOR A VARIANCE FROM THE FINAL WATER DUTY AND ALLOTMENT YOU MUST SUBMIT A COMPLETED VARIANCE APPLICATION FORM TO THE DEPARTMENT WITHIN 95 DAYS AFTER THE DATE OF THIS NOTICE.** Application forms and information on the variance procedure are available at the Prescott office.

If you have any questions regarding your conservation requirements or if you need an application form and information on the variance procedure, please contact the Prescott AMA at (520) 778-7202.

Sincerely,

A handwritten signature in black ink, appearing to read "Rita P. Pearson".

Rita P. Pearson  
Director

**FCTL003119**

STATE OF ARIZONA  
DEPARTMENT OF WATER RESOURCES  
PRESCOTT ACTIVE MANAGEMENT AREA

**NOTICE OF FINAL IRRIGATION WATER DUTY  
AND MAXIMUM ANNUAL GROUNDWATER ALLOTMENT**

Pursuant to Arizona Revised Statutes (A.R.S.) § 45-565(C), the Director of the Arizona Department of Water Resources hereby gives additional notice of the final irrigation water duty and maximum annual groundwater allotment for the Second Management Period for:

**IRRIGATION GRANDFATHERED RIGHT CERTIFICATE NO. 58-107206.0000**

The following is the final irrigation water duty and maximum annual groundwater allotment for the above-referenced irrigation grandfathered right. The water duty and allotment shall become effective beginning in calendar year 2000, and shall remain in effect until the first compliance date of the water duties and maximum annual groundwater allotments established for the irrigation grandfathered right in the Third Management Plan.

<b>IRRIGATION WATER DUTY:</b>	<b>4.87</b>	<b>ACRE-FEET PER ACRE</b>
<b>MAXIMUM ANNUAL GROUNDWATER ALLOTMENT:</b>	<b>13.14</b>	<b>ACRE-FEET PER YEAR</b>

The **irrigation water duty** is the amount of water in acre-feet per acre that is reasonably required to irrigate the crops historically grown in the farm unit to which the above-referenced irrigation grandfathered right is appurtenant. The **maximum annual groundwater allotment** is the maximum amount of water that may be used in any year to irrigate the irrigation acres associated with the irrigation grandfathered right, except as provided in A.R.S. § 45-467, the flexibility account provision. The maximum annual groundwater allotment is calculated by multiplying the final irrigation water duty for the irrigation grandfathered right by the number of water duty acres associated with the irrigation grandfathered right. You were previously noticed of these requirements.

## PUMPAGE MEASURED BY METER OR OTHER TOTALIZER RECORDER DEVICES

### INSTRUCTIONS

1. Enter DWR Well Registration No. & Location in  1 .
2. Enter type, make & model of measuring device used to measure flow in  2 .  
If the measuring device is permanent, enter date installed or last overhauled.
3. Enter power company name, account number, meter number and total energy consumption in  3 . Indicate units as KWH, therms or other measurement.
4. Indicate whether the energy meter serves other uses in  4 .
5. Enter initial totalizer reading as of January 1, in  5 . If your meter reads in 10's, 100's, or 1000's of units, be sure to add the correct number of zeroes.
6. Enter ending reading as of December 31, in  6 . If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.
7. Subtract reading in  5 from reading in  6 and enter the difference in  7 .
8. Convert the Total Amount Pumped to acre feet by using the appropriate conversion; enter the result in  8 .
  - If meter reads in gallons, divide  7 by 325,851
  - If meter reads in cubic feet, divide  7 by 43,560
  - If meter reads in acre-feet, no conversion is necessary
9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period in  9 .
10. Add  8 and  9 and enter result in  10 .

ENTER THE FOLLOWING ON SCHEDULE A OR PART I OF SCHEDULE A-ISR
